

Startersets für den JÖST Floor Sander Junior & Big Boy Junior

Starter Set for the treatment of wood

This starter set covers the treatment of laid wooden floors. With grit 40 even oiled floors can be sanded and prepared for the new oiling with finer grits.

The takeit®-pad purple is proving successful at several oil-producing companies, as it is excellently suited for absorbing residual oil and wax left over after surface oiling and for working it into the surface – and the fine grit also ensures a wonderfully smooth surface. The Superfinishing Pad SG 600 is ideal for matching differences in shine, especially with sealed floors –and a satin finish is achieved on oiled surfaces.

Contents:

- Superpad P 40, 60, 80, 120 und 150
- Dust-disc
- takeit-Pad purple
- Superfinishing Pad SG 600
- Dimension: 190 x 340 mm

Starter Set for hard surfaces (hard lacquer, screed)

Thanks to its sanding grit of circonia or ceramic our Abrafilm® is great for sanding old lacquer. It can also be used to remove concrete haze and smooth screed floors up to a certain degree. The finer grits can be used for polishing screed and bring back the shine to worn marble floors.

Contents:

- Abrafilm Z40, Z60, Z150, C240, C500, C800, C1200, C2000
- Dust-disc
- Dimension: 190 x 340 mm

Starter Set for renovation work (laminare and sealed parquet floors or waxed surfaces)

This starter set is ideal for refurbishing used surfaces – quickly, effectively and cost-saving.

The Superfinishing Pad SG 240 tackles the cleaning of heavily over-maintained floors without the need to remove the lacquer. And the Superfinishing Pad SG 600 and SG 1500 can perfectly match those annoying different degrees of shine, too – something that happens often on sealed parquet floors. Even heavily-used parquet floors end up looking like new.

Light scratches and dirt are also removed, making the floor much smoother. And the Superfinishing Pad SG2 1800 is ready to step in if a more intensive shine is needed after the SG 600 and/or SG 1500 have been used. In case of heavy scratches (often found on laminate floors), they can be removed with the Abrafilm® 500. A matt but uniform surface is the result - and the SG-pads can then be used to polish it to the required degree.

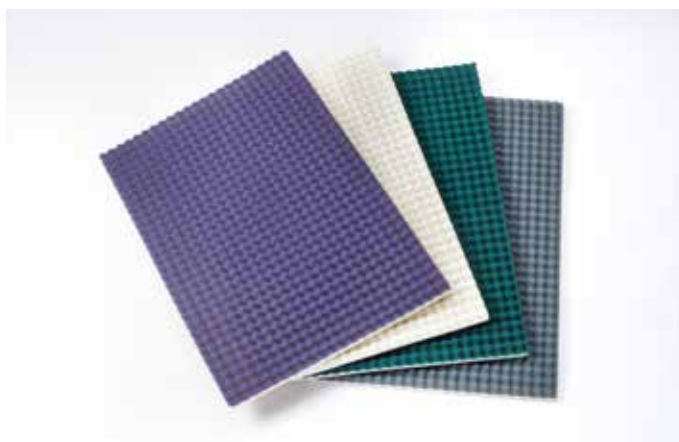

Contents:

- Superfinishing Pad SG 240, SG 600, SG 1500, SG2 1800
- Dust-disc
- Abrafilm C240, C500
- Dimension: 190 x 340 mm

Starter Set for floor maintenance

This set with Abranopp® pads is suitable for the cleaning of structured floor coverings (e.g. studded rubber floorings), for the removal of adhering dirt, walking marks, for the floor maintenance and removal of old wax or old coatings. Always use the Abranopp pads wet.

Contents:

- Abranopp purple, white, green, grey
- Dimension: 190 x 340 mm
