abrasives

# RESISTANT

The newly developed useit®-ABRAFILM® offers excellent cutting performances and has an extremely durable and tearproof film carrier.

The finest sanding up to grit 3000 is possible with the useit®-ABRAFILM®. This results in smoother sanding and therefore a finer result.

The multi-hole perforation of the abrasive in combination with the multilayer structure of the Velcro-type system guarantees the exact alignment of the abrasive grain.

This leads to continuous dust extraction over the entire surface, optimum sanding results and a much higher service life.

**The useit®-ABRAFILM® is suitable for both wet and dry sanding.**

Thanks to the multi-hole perforation, the patented useit®-ABRAFILM® discs fit on all sanding machines available on the market, irrespective of the different number of holes in the backing plates. This ensures 100% availability and major savings in storage costs.

## TECHNICAL DATA:

Synthetic resin with stearate coating

Extra open coat

Special Velcro-type backing

Grit Zirconia P40 - P220

Ceramic P240 - P3000
