CRUSTY
by JÖST

CLEANING WITHOUT CHEMICALS

Our CRUSTY® products easily remove soap residues, greasy deposits and lime from sensitive surfaces, such as glass, stainless steel, tiles and ceramics. The CRUSTY® line has a unique grain mixture that enables scratch-free work on sensitive surfaces. The various CRUSTY® pads are available in different dimensions and shapes. The pad holders are ideal for working over large areas, and the sponge is perfect for those hard-to-reach places such as fittings. And best of all, you only need water to get great results – no chemicals necessary!
