FLOOR CLEANER JUNIOR 18

Battery eccentric cleaning machine

Effortless work thanks to ease of use! Only 14 cm working height, ideal for those hard-to-reach areas.

Cleans right into the corners. Suitable for all floor coverings in combination with the JÖST cleaning pads.

No more tripping over cables lying around. More than 200 other machines can be operated with the multi-manufacturer CAS rechargeable battery.

45 minutes
battery autonomy

User-friendly

Working width
190 x 340 mm

Only 14 cm
working height

Fast charging:
80% in 20 minutes

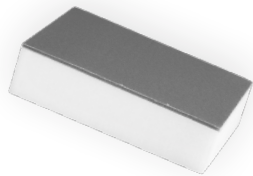

Gets right
into corners

All machines also available to lease.

Glass, stainless steel, tiles, whatever the challenge – our **Crusty® cleaning products** will remove limescale from every surface. Unbelievable but true! See for yourself! And the best thing about it? It's chemical-free AND totally scratch-free.

The various CRUSTY® pads are available in different dimensions and shapes. The pad holders are ideal for working over large areas, and the sponge is perfect for those hard-to-reach places such as fittings.

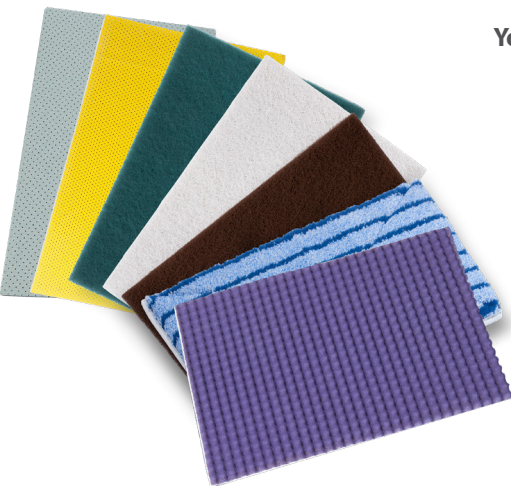

STAINLESS STEEL CLEANING
WITHOUT CHEMICALS

Cleaning without chemicals

Our high-quality cleaning pads made in Germany deliver excellent cleaning results on a wide variety of floor coverings, without any chemicals (available in all common dimensions and diameters)

You have the choice

- Nub pad
- Maroon pad
- Lawn pad
- Melamine pad
- Microfiber pads
- Normal pads
- Superpads
- Sanding pads

Can be used on:

parquet, laminate, carpeting, safety floors, natural and artificial stone, design vinyl, PVC, linoleum, Bangkirai terrace floorboards and much more

LIME PROBLEMS ON
GLASS OR CERAMICS?

The Blue Magic Dust-Binding Cloth

The test winner among the dust-binding cloths. Ideal for removing dust, loose dirt or animal hair. Complies with DIN13063 for dry cleaning in hospitals.

- SUSTAINABLE NATURE CONSERVATION
- SELF-SUFFICIENT ENERGY SOURCES
- PRODUCTION MADE IN GERMANY

Respectful interaction, sustainable management and environmental protection have always been important to us. We completely dispense with carcinogenic formaldehyde in our production and use only environmentally friendly binding resins. We also make every effort to avoid unnecessary CO2 emissions by keeping the supply chains as short as possible. We source our primary products from Germany and neighboring countries. All our products are "Made in the Odenwald!" (Forest of Odin). Thanks to our wind, solar and battery systems, the wind and the sun help us along our path to climate neutrality.

As a board member of the Strahlemann Foundation, Christian Jöst is committed to helping socially disadvantaged children. Not every child is lucky enough to grow up in a sheltered home, so to give these children a better future, they're supported when they enter professional life. Convince yourself of the respectful interaction with people & nature. You'll be made very welcome! Maybe you want to pet one of our seven alpacas who enjoy 'mowing' our lawns? Or do you fancy delighting your palate with our own delicious honey, which our five bee colonies produce with a lot of love – and they ensure plant diversity at the same time.

MY ODENWALD

Do you have any questions at all?

We'll be delighted to advise you personally and competently on the following telephone numbers:
