

JÖST SYSTEM - *DRY* REMOVAL OF A FLOOR FINISH

The Jöst System gives you many advantages compared to conventional chemical wet cleaning. With the Jöst Abraflex® Maroon Pad, an area of 160 to 200m² can be efficiently cleaned without the need for a basic cleaner. This not only protects the environment and your employees; it also saves costs.

Recommendation: Clear the room completely to prepare for cleaning. Now dust and coarse dirt must be removed from the floor. Enter our special Blue Magic Dust-Binding Cloth!! Its unique coating captures dust and loose dirt easily.

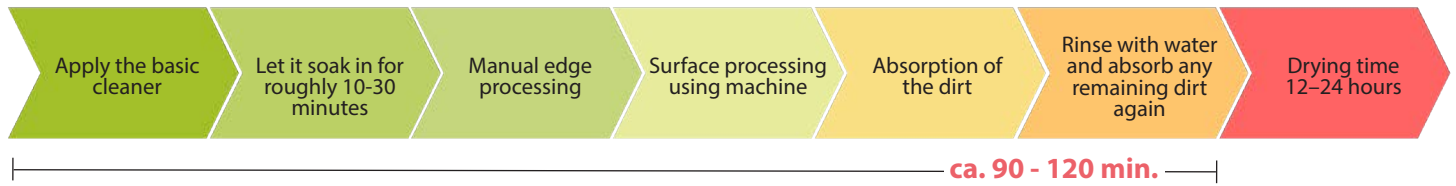

Recommendation: Start removing your floor's finish with our Floor Sander and the Jöst Maroon Pad. Please note that when dry sanding, you should always use an adapter pad to ensure even floor processing and to compensate for any unevenness. The pressure of the machine can be individually adjusted using the additional weights to determine the cleaning intensity of the pad. Vacuum the pad after roughly 20m². The Floor Sander machine allows you to work right into corners.

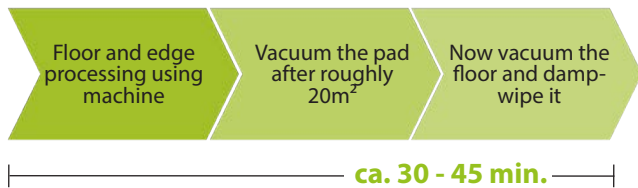

Recommendation: Finally, use an external vacuum cleaner to remove any remaining dust from the floor and damp-wipe it. Drying times of 12 to 24 hours are no longer needed – the floor is immediately ready for its new finish!

Time savings for basic cleaning using a 50m² classroom as an example

Wet basic cleaning using a single-disc machine and basic cleaner

Dry basic cleaning using the Floor Sander and the Jöst Abraflex® Maroon Pad

Time savings of at least **50%**

€30 savings per room
(4 liters basic cleaner
+ 1 liter finish)

160-200m² with one
Jöst Maroon Pad
= 4 x 50m² rooms

Drying time
eliminated = increased
flexibility

Longer lifespans for
your floors

No basic cleaner and
no disposal via
wastewater

Part number	Description	Dimensions	Delivery form	PU
FS-315/460	Floor Sander (incl. 4 weights)	335x485 mm	pallet	1
MP-335/485	Abraflex® Maroon pad for FS	335x485 mm	in polybag	5
AD-335/5	useit® Interface pad 5mm thickness	335x485 mm	in polybag	1
AD-335/15	useit® Interface Pad 15mm thickness	335x485 mm	in polybag	1
BM-450x150	Blue Magic dust-binding cloth	450x150 mm	in foil	10

Technical data - Floor Sander

Power consumption:	1500 Watt	Weight:	57 - 83 kg
Motor speed:	2800 1/min	Additional weight each:	6,5 kg
Working area:	335x485 mm	Vacuum cleaner:	1000 Watt
Supply voltage:	230 V	Sanding stroke:	7mm
Network voltage frequency:	50 Hz
